Keep Doing What You're Doing, But Better

Effortless, automated, and accurate- DataRails' FP&A solution revolutionizes the way FP&A work is done. Without changing how you work on Excel, our technology automates spreadsheet processes that are all too often done manually. With DataRails you can save time, gain newfound insights, and finally have confidence in what your numbers are telling you.

How It Works

Let teams keep working on their native spreadsheet as information is automatically synced onto a secure, structured database that is stored on the cloud. In turn you'll gain access to accurate data and traceability, all in one place.

While your work process is enhanced significantly, you and your employees won't feel a thing.

What DataRails Does for You:

Process Automation

Enjoy automatic data aggregation and reduce your manual spreadsheet work by over ¾. Leverage speed to make the right decisions at the right time.

Business Insights

Produce customized visualizations to uncover previously hidden insights. Create accurate reports and models that pull data from your centralized database for real-time analysis of any possible scenario, and make predictions based on data you can trust.

Data Consolidation

Engage in an active planning process that is collaborative, comprehensive, and continuous. Produce budgets and forecasts you can trust by planning continuously using data from all corners of your business.

Management Reporting

Easily access and extract vital information for reporting such as data on revenue, expenses, and profitability. Keep tabs on current figures, and get an accurate picture of where the numbers are going.

Immediate Data Integrity

View the full history of a cell, including values and formulas that have changed markedly over time. Count on one version of the truth, and trust that it will help you make the right decisions.

Enhance the efficiency of key processes including budgeting, forecasting, ad-hoc analysis, strategic planning, capital expenditure analysis and more.
