

To Whom It May Concern,

This statement confirms that **Datarails** service was tested in accordance with **OWASP Testing Guide V4**.

The penetration testing included the following assets:

- <https://ppapp.datarails.com/>
- 52.224.189.24
- 20.90.238.96
- an Excel add-in, downloaded from:

https://static.datarails.com/downloads/dr_file_sync_app/last/download.htmlProduct

GRSee has performed an application and external infrastructure penetration test.

The conducted security tests were performed in accordance with OWASP testing guide and included the following domains:

- Information Gathering
- Configuration and Deployment Management Testing
- Identity Management Testing
- Authentication Testing
- Authorization Testing
- Session Management Testing
- Input Validation Testing
- Error Handling
- Cryptography
- Business Logic Testing
- Client Side Testing

The penetration test conducted in a grey-box setting, under which the tester was well-informed regarding the environment and general information, such as users and passwords for testing scenarios, relevant servers' IP addresses and purpose, and was provided with guidance regarding application procedures, and general systems properties.

The penetration test concluded with 6 Medium, 2 Low and 6 informative vulnerabilities.
